# openEQUELLA

## What is openEQUELLA?

### Overview

openEQUELLA is an open source digital repository that provides one platform to house your teaching and learning, research, media and library content. Formerly called EQUELLA, it is now known as openEQUELLA. openEQUELLA has been deployed for copyright resource collections, research materials, managing and exposing materials through websites and portals, content authoring, workflow, institutional policy and organisational resources.

openEQUELLA is currently in use in a wide range of schools, universities, colleges, TAFEs, departments of education, government agencies, and corporations worldwide.

### Manage content in various departments

- Learning & Teaching
- Library
- Research
- ICT
- Institutional Governance

## openEQUELLA enables:

- Content tagging for alignment with curriculum and established learning and training outcomes

- Digital rights management

- Streamlined workflows for effective quality assurance

- Efficient reporting of content usage

- Seamless integration with other platforms such as popular LMSes

### Search
Sort and filter for fast discovery of content.

### Manage
Access a platform with effective metadata management, security and reporting.

### Create
